

You don't read it? Dump it!

M.A.I.L is an extension of your professional mailbox. It analyzes your emails and decides whether or not to keep them. Your carbon footprint will be reduced without any effort!

THE IMPORTANCE OF DELETING YOUR EMAILS!

The average French person tends to read only 20% of their emails. Knowing an ENSEEIHT student will receive around 400 emails during their 3-year-long cursus, it will be as if they did a Paris-Luxembourg car trip!

Programming and AI development

Create an extension of Renater Partage

Adaptability

Extend it to the INP or any university

Negotiating

Use custom submerged data centers

Communication

Propose it to any entreprise

13 CLIMATE ACTION

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Long term goal:
<1% of false positives

The project relies on AI, which can cause some errors. However, M.A.I.L as an AI will evolve thanks to our specialised staff. The entreprise does have some threats such as LiloMail or Clean Mail
